

TRADE CONTROL AND EXPERT SYSTEM NEW TECHNOLOGY (TRACES NT) TRAINING PROGRAMME

WALVIS BAY – 11 & 12 OCTOBER 2021

Why Register for Traces Training

The European Commission requires consignments of **animals, semen and embryo, food, feed and plants**, to be accompanied by **health certificates** or **trade documents**.

When such consignments are exported to the EU or traded within the **EU single market**, TRACES manages the official controls and route planning, quickly and efficiently online.

With its user-friendly **interface**, available in **35 languages**, shared by the **private sector** and the **competent authorities**, TRACES relieves much of the administrative burden usually involved in these processes.

Who should attend?

The NSI will be providing training for TRACES NT in October 2021, as a result of requests from exporters to move from the "manual system" to using TRACES, which is better and expedites the certification process of products destined for the EU market. In essence the new EU regulation 2019/628 is encouraging online certification.

The training will be conducted in groups of no more than 15 persons per training session.

Language

This course is presented in the English language.

Learning Material

Course material includes a Training Manual, PowerPoint presentation and lectured accordingly. (Please bring along a laptop)
